DOP-*B05*

High Color • Wide Screen • User-Friendly HMI Products

B05S111 **Instrunction Sheet**

(1) Preface

Thank you for purchasing DELTA's DOP-B series. This instruction sheet will be helpful in the installation, wiring and inspection of Delta HMI. Before using the product, please read this instruction sheet to ensure correct use. You should thoroughly understand all safety precautions before proceeding with the installation, wiring and operation. Place this instruction sheet in a safe location for future reference. Please observe the following precautions:

- Install the product in a clean and dry location free from corrosive and inflammable gases or liquids.
- Ensure that all wiring instructions and recommendations are followed.
- Ensure that HMI is correctly connected to a ground. The grounding method must comply with the electrical standard of the country (Please refer to NFPA 70: National Electrical Code, 2005 Ed.).
- Do not disassemble HMI, modify or remove wiring when power is applied to HMI.
- Do not touch the power supply during operation. Otherwise, it may cause electric shock.

If you have any questions during operation, please contact our local distributors or Delta sales representatives.
The content of this instruction sheet may be revised without prior notice. Please consult our distributors or download the most updated version at http://www.delta.com.tw/ia

(2) Safety Precautions

Carefully note and observe the following safety precautions when receiving, inspecting, installing, operating, maintaining and troubleshooting. The following words, DANGER, WARNING and STOP are used to mark safety precautions when using the Delta's HMI product. Failure to observe these precautions may void the warranty!

Installation

DANGER
- Comply with quick start for installation. Otherwise it may cause equipment damage.
- Do not install the product in a location that is outside the stated specification for the HMI. Failure to observe this caution may result in electric shock, fire, or explosion.
- Do not install the product in a location where temperatures will exceed specification for the HMI. Failure to observe this caution may result in abnormal operation or damage the product.
- Please note that this equipment has obtained EMC registration for commercial use. In the event that it has been mistakenly sold or purchased, please exchange it for equipment certified for home use.
- Do not use this product as an alarm device for disaster early warning that may result in personal injury, equipment damage, or system emergency stop.

Wiring

DANGER
- Connect the ground terminals to a class-3 ground (Ground resistance should not exceed 100Ω). Improper grounding may result in communication error, electric shock or fire.

Operation

WARNING
- The users should use Delta Screen Editor software to perform editing in Delta's HMI product. To perform editing and confirming HMI programs without using Delta Screen Editor software in Delta's HMI product may result in abnormal operation.
- To prevent the personal injury and equipment damage, when designing HMI programs, please ensure that a communication error occurred between Delta's HMI product and the connecting controller or equipment will not result in system failure or malfunction.
- Please be sure to backup the screen data and HMI programs in case they are lost, accidentally deleted or worse.

STOP
- Do not modify wiring during operation. Otherwise it may result in electric shock or personal injury.
- Never use a hard or pointed object to hit or strike the screen as doing this may damage the screen and let the screen has not respond at all, and then cause HMI to work abnormally.

Maintenance and Inspection

STOP
- Do not touch any internal or exposed parts of the HMI as electrical shock may result.
- Do not remove operation panel while power is on. Otherwise electrical shock may result.
- Wait at least 10 minutes after power has been removed before touching any HMI terminals or performing any wiring and/or inspection as an electrical charge may still remain in the HMI with hazardous voltages even after power has been removed.
- Turn the power off before changing backup battery and check system settings after finishing change. (all data will be cleared after changing battery).
- Be sure the ventilation holes are not obstructed during operation. Otherwise malfunction may result due to bad ventilation or overheating troubles.

Wiring Method

WARNING
- Do not use a voltage that will exceed specification for the HMI. Failure to observe this caution may result in electric shock or fire.
- Remove the terminal block from the HMI before wiring.
- Insert only one wire into one terminal on the terminal block.
- If the wiring is in error, perform the wiring again with proper tools. Never use force to remove the terminals or wires. Otherwise, it may result in malfunction or damage.
- For the power line that forced to take out, ensure to check wiring again and restart.

Communication Wiring

WARNING
- Comply with communication wiring specification for wiring.
- Wiring length should comply with the stated specification for the HMI.
- Proper grounding to avoid bad communication quality.
- To avoid noise and interference, the communication cable, all power cables, and motor power cable should be placed in separate conduits.

(3) Pin Definition of Serial Communication

DOP-B05S111 COM1 Port (Supports Flow Control)

COM Port	PIN	Contact RS-232
PIN1	1	
	2	RXD
	3	TXD
	4	
	5	GND
	6	
	7	RTS
	8	CTS
	9	

Note: Blank = No Connection

DOP-B05S111 COM2 and COM3 Port

| COM Port	PIN	MODE1 COM2 RS-232	MODE1 COM3 RS-485	MODE2 COM2 RS-485	MODE2 COM3 RS-485	MODE3 COM2 RS-232	MODE3 COM3 RS-422
PIN1	1			D+			TXD+
	2	RXD				RXD	
	3	TXD				TXD	
	4		D+		D+		RXD+
	5	GND		GND		GND	
	6				D-		TXD-
	7						
	8						
	9		D-		D-		RXD-

Note1: Blank = No Connection.
Note2: B05S111 models do not support RS-422 flow control function.
Note3: COM3 is the extension port (COM2 and COM3 share one physical port)

(4) Parts Names

DOP-B05S111 (Front View)

| A	Power LED Indicator (Lights in green when HMI works normally.)
B	Touch Screen / Display

DOP-B05S111 (Rear View)

A	Power Input Terminal	E	USB Host
B	COM2 (can be extended to COM3 (Note1))	F	USB Slave
C	COM1	G	System Key
D	Battery Cover	-	-

NOTE

1. For the setting method, please refer to the pin definition of serial communication.

(5) Dimensions

172.4+1(6.79"+0.04")

184(7.24")

132.4+1(5.21"+0.04")

144(5.67")

43.3

Note:
T=1.6mm(0.063")~
6mm(0.24")

Units: mm (inches)

(6) Specifications

Model		DOP-B05S111
LCD MODULE	Display Type	5.6" TFT LCD (65536 colors)
	Resolution	320 x 234 pixels
	Backlight	LED Back Light (less than 20,000 hours half- life at 25℃) [Note 1]
	Display Size	113.28 x 84.70mm
Operation System		Delta Real Time OS
MCU		32-bit RISC Micro-controller
NOR Flash ROM		Flash ROM 128 MB (OS System: 30MB / Backup: 16MB / User Application: 82MB)
SDRAM		64Mbytes
Backup Memory		16Mbytes
Sound Effect Output	Buzzer	Multi-Tone Frequency（2K ~ 4K Hz）/ 85dB
	AUX	N/A
Ethernet Interface		N/A
USB		1 USB Host [Note 2] Ver 1.1 / 1 USB Slave Ver 2.0
Memory Card		N/A
Serial COM Port	COM1	RS- 232 (supports hardware flow control)
	COM2	RS-232 / RS-485
	COM3	RS-422 / RS-485
Function Key		N/A
Perpetual Calendar (RTC)		Built- in
Cooling Method		Natural air circulation
Safety Approval		CE / UL [Note 3] / KCC [Note 3]
Waterproof Degree		IP65 / NEMA4
Operation Voltage [Note 4]		DC +24V（-10% ~ +15%）(please use isolated power supply)
Voltage Endurance		AC500V for 1 minute (between charging (DC24V terminal) and FG terminals)
Power Consumption [Note 4]		3.0W
Backup Battery		3V lithium battery CR2032 x 1
Backup Battery Life		It depends on the temperature used and the conditions of usage, about 3 years or more at 25℃.
Operation Temp.		0°C ~ 50°C
Storage Temp.		-20°C ~ $+60^\circ$C
Ambient Humidity		10% ~ 90% RH [0 ~ 40℃], 10% ~ 55% RH [41 ~ 50℃] Pollution Degree 2
Vibration		IEC 61131- 2 compliant 5Hz≦f＜8.3Hz = Continuous: 3.5mm, 8.3Hz≦f≦150Hz = Continuous: 1.0g
Shock		IEC 60068- 2- 27 compliant 15g peak for 11 ms duration, X, Y, Z directions for 6 times
Dimensions (W) x (H) x (D) mm		184 x 144 x 50
Panel Cutout (W) x (H) mm		172.4 x 132.4
Weight		Approx.670g

NOTE

1) The half- life of backlight is defined as original luminance being reduced by 50% when the maximum driving current is supplied to HMI. The life of LED backlight shown here is an estimated value under 25℃ normal temperature and humidity conditions.
2) USB Host port can provide up to 5V/ 500mA of power.
3) Some models are in the process of application to UL and KCC certification. For more information, please consult our distributors.
4) The value of the power consumption indicates the electrical power consumed by HMI only without connecting to any peripheral devices. In order to ensure the normal operation, it is recommended to use a power supply which the capacity is 1.5 ~2 times the value of the power consumption.
5) The content of this quick start may be revised without prior notice. Please consult our distributors or download the most updated version at http://www.delta.com.tw/ia/.
